THE LATE DR. JAMES MARION SIMS.
 As there are epochs in the history of medicine with which famous names are associated, so there are famous names belonging to the special departments of medicine, names of those who have founded or greatly advanced those special departments. As the circulation of the blood suggests the name of Harvey, of pathological anatomy that of Morgagni, of obstetric anatomy that of Marion Sims, patient, brave, of restless activity; triumphant, noble man. He was a bold pioneer, spending new pathways, and with courage and resolution, he discovered for himself, and made his discoveries a gift to the profession. Even when unconsciously repeating what had been done before him, he greatly carried the discovery, and carried the advance far beyond any predecessor. No matter what may be the great glory of those who have followed his footsteps, the best of them will never have accomplished what they have, had he not shown the way.
